

# ACO Surface Water Management

HIFA Petrol Stations, 2010/2011/2012/2013

## HIFA Petrol Stations - B&H

### SWM system for Commercial Areas

HIFA Petrol Stations in Sarajevo, Tesanj, Kakanj, Banovici, Srebrenik, Zivinice, Zenica, Zavidovici. The preparations for the reconstruction and modernisation of these facilities are recently completed.

The main objectives of the Design Engineer of the project are to provide effective drainage of the site, that will stand the heavy vehicles traffic from the highway and to guarantee treatment of collected surface waters in compliance with all local regulations. The Design Engineer prepares all necessary calculations and installation detail and specifies a complete surface water management solution.

Working with the ACO Design and Service team gives you confidence. You always get the correct technical information on time. ACO has a wide range of product for specific projects.

The effective drainage in the area with intensive heavy traffic is designed with ACO Multiline channels to guarantee optimal efficiency. The collection of surface water is additionally supported with point drainage in the areas of lower traffic where ACO Combipoint gully protects the mortar joints from damages by traffic load, sinking of gully grating and cracking of surfaces. The collected surface water is treated in the ACO Oleopator oil separator to ensure that the project complies with the requirements of local regulations for release of treated water in natural water basin without potential danger of pollution with oil products.

HIFA Petrol Station in Zenica

ACO provides complete Surface Water Management for HIFA Petrol Stations located in Bosnia and Herzegovina - surface water is collected by line and point drainage, treated in oil separator and safely released.

ACO SWM systems for HIFA Petrol Stations

ACO Combipoint

ACO Multiline V200

ACO Oleopator petrol and light mineral oil separator

## Reference at a glance

**Project:** HIFA Petrol Stations

**Location 1:** Sarajevo

**Location 2:** Tešanj

**Location 3:** Kakanj

**Location 4:** Banovići

**Location 5:** Srebrenik

**Location 6:** Zivinice

**Location 7:** Zenica

**Location 8:** Zavidovici

**Location 9:** Bukva

**Client:** HIFA d.o.o.

**Years of construction:**

2010, 2011, 2012, 2013

**ACO Products:**

- ACO Oleopator
- ACO Combipoint
- ACO Multiline V100
- ACO Multiline V150
- ACO Multiline V200

**ACO d.o.o. Sarajevo**
